

Safer Together

VISION

A world free from racism, where poor health outcomes or premature deaths due to oppressive systems no longer exist. A world where everyone has access to quality care.

MODEL

We're a nonprofit organization dedicated to building community healthcare capacity. Our growing network of partnerships allows us to efficiently deliver care and adaptively. We hire from the communities we serve to co-create drive programs and our and initiatives, seeding the health equity leaders of tomorrow and building community power today. We do all of this with determination, flexibility, joy, and love!

MISSION STATEMENT

To improve safety, health outcomes and well-being in our environments by uplifting community members as leaders and working together to increase equitable access and use of free tools and resources by San Francisco community members.

OUR STORY

It's Fall 2020. A virus has disrupted the rhythm of the world completely. No longer in lockdown, San Francisco has done relatively well in battling COVID-19, but rosy numbers hide a growing chasm of inequity hastened by the pandemic: neighborhoods with majority families of color are disproportionately impacted by the virus. This reality is painfully evident when private schools reopen in August while public schools remain closed the entire school year.

Enter co-founders Mari Fraga, Saul Kato, Stacie Calad-Thomson and Tracey Briones, four local parents determined to help reduce the impacts of COVID-19 on families in their city. Countless conversations, research, and hustle lead to the formation of an organization to bring together the resources with the will to help stop the spread of COVID in vulnerable communities.

As we have grown, we've realized that we're more than a scrappy COVID-19 testing nonprofit—we've become a trusted community partner and built a model of community care delivery. We increase community capacity by hiring from the communities we serve, and deliver co-created programs and resources to our network of partnerships nimbly and adaptively. We ensure that the impact of our programs is leveraged towards structural change.

OUR UNIQUE APPROACH

Safer Together trains partner organizations to administer their own rapid tests to their respective community members on their own time.

In doing so, we increase capacity across multiple dimensions— leadership, education, and of course, safety.

Safer Together

Has trained 16 CBOs to self administer COVID-19 test under our CLIA license.

Our network of partnerships includes Community Based Organizations, public institutions, schools, after school programs and more.

SELF-ADMIN PROGRAM

Phase 1

We work with the partner organization to confirm all details necessary to guarantee a productive training session.

Phase 2

Our Community Care
Specialists train the partner
on the ins and outs of rapid
test administration; partners
complete key compliance
requirements.

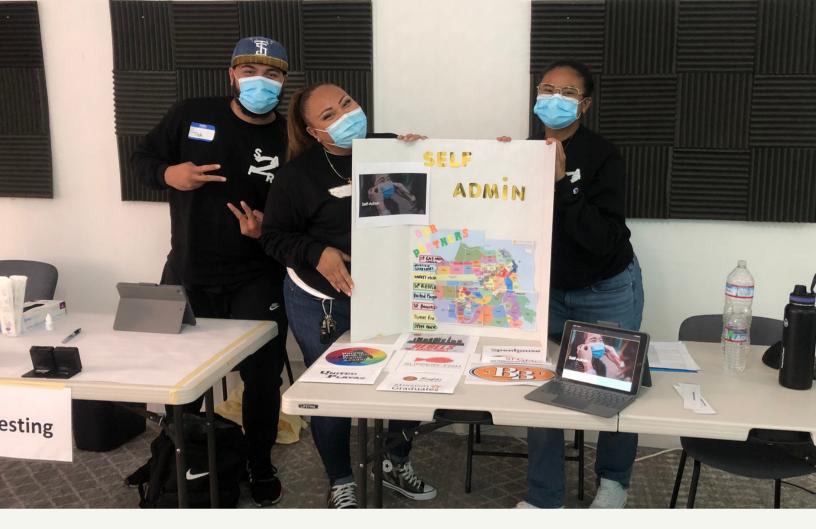

Phase 3

Our Community Care
Specialist supervises the
partner during initial testing
sessions to verify selfsufficiency and address any
final concerns.

Phase 4

Support the partner through provision of case reports, updates on the COVID-19 landscape, and other training opportunities.

- O1. Builds shared leadership and self sufficiency.
- Builds knowledge, education, and awareness of COVID-19 and other public health items for groups that might not otherwise have it.
- Allows Safer Together to reach groups we cant reach due to human resources, time, etc.
- O4. Strengthens our relationship with the community

About ROCK SF

Real Options for City Kids provides academic and social support for at-risk youth in SF's Visitacion Valley whose mission is, "to nurture the healthy development of children by listening attentively to their needs and by providing opportunities to those who might not otherwise have access."

Our Partnership

ROCK SF was Safer Together's first Self-Admin Partner. Our partnership began in **2021**. Safer Together trained members of ROCK SF team to administer COVID-19 tests to themselves and to youth program participants.

About Slippery Fish

Sippery Fish is a co-operative preschool and prepreschool whose mission is to "create and support an inclusive, play-based and childcentered education that honors individual stregths in childrem parents and teachers while fostering relationships between each other, our diverse community and our wider world"

slipperyfish-sf.com

Our Partnership

Our partnership began at the height of the delta variant in **2021**. Slippery Fish applied a "test by proxy" approach - because so many kids are below the age of testing, their parents would test in their place.

Harvey Milk Civil Rights Academy

About United Playaz

Harvey Milk Civil Rights Academy is a small public elementary school in the Castro whose mission is to, "empower students by teaching awareness, acceptance and non-violence, celebrating our diversity, achieving academic excellence, and fostering strong family-school-community connections."

Our Partnership

Harvey Milk Civil Rights Academy 's and Safer Together partnership began in **2021** with the organization of parents and community members who were concerned at the uncertainly of the delta variant and wanted to provide youth additional care. Harvey Milk Civil Rights Academy Self-Admin is parent organized and volunteer lead.

As public schools began to reopen last year for the first time since the pandemic started, there were lots of concerns amongst our school community about preventing the spread of Covid. By teaming up with Safer Together, we were able to provide bi-weekly free onsite rapid Covid testing and/or PCR Covid testing to anyone in our school community.

-Dr. Laura McMullen

United Playaz

About United Playaz

A violence prevention and youth development organization who has been working in the SOMA area of SF for the past 25 years.

Our Partnership

Since our partnership began in **2021** United Playaz has brought our testing to their own organization as well as to schools in the area with whom they work very closely. United Playaz was able to test community members before community gatherings to ensure community safety. Our work together is foundational providing equity-centered community health care to spaces were, youth and families gather.

Mission Graduates

About Mission Graduates

Mission Graduates is an organization all across San Francisco who partners with elementary and middle schools to ensure marginalized youth in the city, particularly Black and Latinx youth, have the skills and confidence essential to make it through school.

Our Partnership

We have trained over twenty staff who represent over ten different schools.

Data Summary 2021-2022

Mission Graduates' partnership with Safer Together came at a time when we were all in a period of uncertainty and fear. Regulations and guidelines were changing frequently and challenging to stay on top of all of it. Safer Together provided us the reassurance and information we needed to better guide our teams and make them feel safe. We began with Safer Together weekly COVID rapid testing our staff from our 7 different Summer programs (over 100 staff).

-Dianna Caracoza

826 Valencia

About 826 Valencia

826 Valencia works with youth in SF to develop writing skills and build creativity, with centers in Mission, Tenderloin, and Mission Bay. We trained staff to administer tests to students so they can attend programs safely.

Our Partnership

826 Valencia first partnered with Safer Together as we welcomed students back to writing centers for our summer programming in 2021. The weekly testing provided by Safer Together helped us keep our community safe during the Delta surge and throughout the 2021-2022 school year. Safer Together also trained members of our staff to self-administer rapid tests as needed. These free services were critically needed, given the disproportionate impact of the virus on low-income communities of color. Thank you, Safer Together, for providing access and reassurance during a period of great uncertainty and challenge!"

"The Women's Building is grateful for our partnership with Safer Together that made it possible to provide rapid testing for our staff, in-house organizations, community members and program participants. With the care and expertise of the Safer Together team, our rapid testing program provided both a safe and convenient testing environment for community members to feel comfortable during uncertain times. It also allowed The Women's Building and In-House organizations to continue to run our programs and provide essential services to our community. "

-Kristen Acosta

Rafiki Coalition

About Rafiki Coalition

The Rafiki Coalition came together as a community-led response to the disproportionate impact of health issues on the Black and African American community. It has since evolved in scope, supplementing health education with resources on housing and community advocacy. From their founding in 1986 as the Black Coalition on AIDS to their present iteration, their mission has been clear and meaningful to eliminate health inequities in San Francisco's Black and marginalized communities through health education, advocacy, and by providing holistic health and wellness services in a culturally affirming environment.

Our Partnership

Rafiki Coalition's mission aligns with our work on a fundamental level. Their work to empower San Francisco's Black/African Americans through education and resources goes hand in hand with our own endeavors to empower the city's most divested communities. In August **2021** Safer Together partnered with the Rafiki Coalition and trained their staff members to administer rapid tests to their clients, enabling the organization to take their health services to new levels while also expanding Safer Together's reach beyond our own staff.

This partnership proved immensely valuable during the omicron surge of Winter 2022. Rafiki Coalition was able to take testing beyond Safer Together's sites and for many weeks registered testing averages of over 100. We have no doubt that transmission lines were cut and community awareness increased thanks to their tireless effort, and are profusely grateful for all that they do.

Safer Together's, Self-Admin Program Positivity Rate

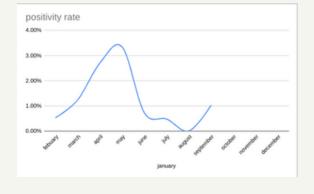

2021-2022

WHAT IS THE "POSITIVITY RATE" AND WHY DOES IT MATTER?

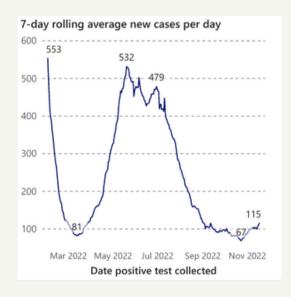

The positivity rate is a critical measure that gives us an indication of how widespread infection is in the area where the testing is occurring—and whether levels of testing are keeping up with levels of disease transmission.

The higher the percent positive is, the more concerning it is.
